

Rakshith M N

Basically a mechanical engineer with a keen interest in Data Analytics and Web Development, I possess proficiency in DSA, SQL, Python, and various front-end tools. Enthusiastic about acquiring knowledge of emerging technologies and frameworks. Eager to collaborate with teams, committed to delivering sustainable results for both my team and the company. I approach my work with passion, focus, and dedication.

EDUCATION

B.E: Mechanical Engineering Bangalore Institute of Technology

07/2019 - 06/2023

VV Puram, Bengaluru

Academics

- Current CGPA- 8.28

12th: PCMB MES Pre-University College

08/2016 - 07/2018

Malleswaram, Bengaluru

Academics

- Percentage- 80.66

INTERSHIPS & PROJECTS

Internship Trainee Bharat Electronics Limited

02/2023 - 03/2023

Bengaluru

Tasks

- During my internship at BEL, I gained insight into RADARS, Missile Launch Units, and Weapon Control Systems. This experience allowed me to explore the theoretical aspects of these advanced systems, included their design, functionality, and operational principles. I developed a comprehensive knowledge of these critical defense technologies.

Contact : Roshan D'Souza (Project Manager - ADSN)

3D PRINTING MODEL AND ANALYSIS Bangalore Institute of Technology

11/2021 - 03/2022

Bengaluru

Tasks

- Designing a CAD model of a hinge, fabricating it with 3D printing technology. Stress & deformation analysis were carried out in Ansys Workbench to determine the workpiece's strength. This project emphasizes the importance of 3D printing.

Contact : Dr. Babu E R (Asst. Prof. Dept of Mechanical Engineering)

FABRICATION & CHARACTERIZATION OF NATURAL COMPOSITES SJC Institute of Technology

08/2022 - 06/2023

Chikkaballapur

Tasks

- I have been actively engaged in a comprehensive research project focused on composite materials. The purpose of this project is to create a composite that is both lightweight and durable with a wide range of potential applications, from construction to aerospace and beyond. This research is at the forefront of material science and engineering innovation.

PERSONAL PROJECTS

Power BI Report

- Developed a dynamic Power BI report, employing SQL queries and Power Query Editor for data refinement. Established an optimized data model to seamlessly interactive visualizations resulting in an engaging and user-friendly experience.

Amazon Website Clone

- I designed a website replicating Amazon's look with HTML and CSS, utilizing CSS Grid and Flexbox for an organized layout. This project demonstrates my web development and design expertise, emulating the Amazon website's visual style.

Portfolio Website

- I created a dynamic portfolio website using HTML, CSS, and JavaScript, emphasizing responsiveness for diverse devices. It presents my work and skills in a compelling and interactive format, providing visitors with an engaging user experience.
